Highly experienced in backend development with **Python** and **Golang** programming languages.
Great understanding of DevOps and frontend technologies.

Tech Stack

Programming Languages: Python, Golang, C, C++, Clojure

Web frameworks: Django, Flask, Django rest framework

DevOps: Docker, Kubernetes, Helm, Jenkins, CI/CD pipelines

Databases: Postgres, MySql, Redis

Frontend technologies: HTML, Javascript, Jquery, VueJs framework

Other: Blockchain, Cryptography, Elasticsearch

Work Experience

BetterWorks

OCT 2020 - PRESENT

Software Engineer (Remote)

I am working as a Software engineer with BetterWorks(California, US). I primarily work in the KR integration team whose main responsibility is to integrate the main product(OKR framework) to the third-party platform.

Roles and Responsibilities:

- Design and develop an IPAAS (Integration platform as a service) platform from scratch which increases the velocity of adding new integration to the platform by 6 times. The IPAAS platform allows to onboard a new integration in a "plugged-in" fashion.

- Refactoring and feature enhancements for the legacy integrations. Gradually import legacy integrations to the new IPAAS platform.

- Accountability for taking the right decision in technology for a product.

- Actively participate in managing the release and deployments of new product features and bugs.

Impact so far:
- Added a major contribution to building a solid KR integration team by actively participating in the hiring process for a new team member.

- Added a major contribution to developing and releasing 6 new integrations which help to onboard the new customers on the Betterworks platform and increase the sales revenue.

Karix Mobile Pvt Ltd
SEPT 2018 - OCT 2020

Software Engineer

I worked as a Software engineer with Karix Mobile Private Ltd, Bangalore. Some of my major responsibilities include:
- Design and develop microservices and rest APIs for KarixIO platform. Microservices are written in **Python** and **Golang** programming languages.

- Design and develop internal admin/ops dashboard. This dashboard is used by sales and support teams. The major purposes of this dashboard are:
  - User accounts management.
  - User payments management.
  - SMS routing management.
  - SMS pricing management.
  - WhatsApp profiles management.
  - WhatsApp docker containers management.

Chumbak Design Pvt Ltd.
JAN 2018 - SEPT 2018

Software Engineer

I worked as a Software engineer with Chumbak Design. Some of my responsibilities there:
- Design and develop rest APIs for Chumbak platform in **Python** with **Django** web framework.
- Design and develop an internal attendance monitor desktop application. This application is used by Chumak's employees.

DoubleSpring Media India (p) Ltd.
JUNE 2017 - JANUARY 2018

Backend Developer

I worked as a Backend developer with Double-Spring Media, Bangalore. My major responsibility there is to write the rest APIs in Python/Django for the company's products like CRM, HRM and Project management.

Concur Technologies

Intern

I worked as an Intern with Concur Technologies(An SAP company), Bangalore. My job was to develop Unix/Linux CLI which can handle information security issues with cryptographic applications. This project was written in *Clojure*. It is completed with bash completion and installation script.

Projects

Crypto-CLI

JUNE 2018

https://github.com/rishikant42/Crypto-CLI

A Unix/Linux CLI to perform cryptographic operations. The source code is written in **Python.**

Blockchain

JUNE 2018

https://github.com/rishikant42/blockchain

A very basic **Blockchain** library is written in **Python**.

Certifications

Helm: Package manager for k8s

SEPTEMBER 2021

Udemy
